DE

Die **Freie Universität Bozen** fördert im Rahmen ihrer institutionellen Aufgaben curriculare und extra-curriculare Ausbildungs- und Orientierungspraktika, um die akademische Ausbildung durch Praxiserfahrung zu ergänzen. Praktika dienen dazu, die Studierenden mit der Arbeitswelt in Kontakt zu bringen um auf diese Weise Theorie und Praxis zu verbinden. Die Studierenden erhalten Einblick in die zukünftige Berufstätigkeit und können sich mit der Berufswahl kritisch auseinandersetzen.

Ein wesentlicher Aspekt des Praktikums liegt in der Reflexion: Sinn und Zusammenhänge der Erfahrungen zu reflektieren und zu verstehen stellt eine Grundvoraussetzung dar, um die eigenen Wünsche und Bedürfnisse in diesem Kontext zu erkennen, die eigenen Stärken und Schwächen auszuloten und neue Kompetenzen zu entwickeln. Nur wer die Dynamiken der Arbeitswelt kennt und kritisch reflektiert, kann seine berufliche Zukunft bewusst selbst gestalten.

IT

La **Libera Università di Bolzano**, nell'ambito delle sue finalità istituzionali, promuove tirocini curricolari ed extra-curricolari di formazione e orientamento che si propongono di completare la formazione accademica. Scopo del tirocinio è quello di porre gli studenti e le studentesse in contatto con il mondo del lavoro, in modo tale da creare un nesso tra teoria e prassi. Inoltre, l'esperienza diretta con il mondo del lavoro permette di acquisire la conoscenza della futura attività professionale e di sviluppare una riflessione critica sulle scelte professionali.

Un elemento caratterizzante del tirocinio è infatti proprio quello della riflessione: riflettere e comprendere il senso e i collegamenti delle esperienze vissute è fondamentale per capire i propri desideri, le proprie esigenze e il contesto in cui si agisce, per individuare i propri limiti e le proprie potenzialità e per acquisire delle competenze concrete. Conoscere le dinamiche lavorative e organizzative e riflettere criticamente su di esse serve a costruire il proprio futuro professionale.

EN

As part of its institutional role, the **Free University of Bozen-Bolzano** promotes curricular and extra-curricular internships in order to complement academic training with practical experience. The purpose of the internships is to put students in contact with the world of work, in order to create a link between theory and practice. In addition, direct experience with the world of work allows interns to acquire knowledge of future professional activities and to critically reflect on career choices.

In fact, a defining element of the internship is precisely that of reflection. Reflecting on and understanding the meaning and connections of life experiences is fundamental to understanding a person's wants, needs and the context in which a person acts. As well as identifying one's own limits and potential, reflecting on life experiences leads to acquiring hard skills. Knowing the organisational dynamics of work and critically reflecting on them helps to develop one's professional future.
