

BACHELOR IN INDUSTRIAL AND MECHANICAL ENGINEERING L-9 – CHOICE OF STUDY PLAN

The study programme is subdivided into four majors:

- Mechanics
- Energetics
- Logistics and Production
- Automation

There are two types of study plan for all four majors (subject to the approval of the Academic Senate):

- Study plan for **full-time** students (3 years)
- **Dual** study plan (alternating studies and work – 4 years)

By choosing the dual study plan you have the opportunity to combine studies and work. The first year you are a full-time student whereas starting with the second year you will alternate studies and work. In this case the duration of the programme is extended to four years.

By the end of the first year you will be able to sign an employment contract with one of the companies already participating in the programme or with a company that is willing to support your dual study path.

More information available online on the study programme website.

Fill in the form with your personal data and choose your study plan.

I (Name/Surname) _____ Application ID. _____

_____ applicant to the Bachelor in Industrial and Mechanical Engineering

major in _____

Confirm my application to the

- study plan for full-time students (3 years)
- dual study plan (alternating studies and work – 4 years)

Date _____

Signature _____
