

Regensburger Verbundklassifikation

Agriculture and Forestry

Horticulture, Fishery

Domestic Science

[ZA-ZE]

Regensburg University Library Berlin 1997

4th edition 1997

As at: September 1997

INTRODUCTION

The basis of the specialised system for classifying the Agricultural Sciences, first drawn up in 1976, is the Division by Topics for Agricultural Sciences ("Stoffeinteilung der Landwirtschaftswissenschaft") by Sigmund von Frauendorfer (Munich- Bonn - Vienna; 3rd revised and enlarged edition 1976)

The 2nd and 3rd editions (1983 and 1991) were enlarged only in respect of few terms and correspond in the main to the structure of the previous edition.

The 4th edition, herewith presented, has been comprehensively revised with the exception of the areas of Forestry, Hunting and Domestic Science.

The reworking of the classification system was in the hands of the University Library Berlin. In the final stage, suggestions and support were given by the Regensburg and

Hohenheim University Libraries. Out of consideration for past and present members of the Regensburger Verbund, compromises had to be made in stipulating the notation. That means above all, a planned hierarchical structure. The new topics could only be represented by introducing a five-figure notation throughout. The requested country key 1 (of the classification system general) can be used with all notations, when it is necessary, logical and possible as far as the number of figures is concerned. The exclusion of the country key is denoted by # against the relevant notations.

With few exceptions, the "9" positions are reserved in principle for "Other". A detailed alphabetical subject index is in progress.

CONTENTS
