

# Announcement of a Professorship Position in Environmental Economics

The Free University of Bozen-Bolzano, Italy, is planning to open a position of an

## **Endowed Professorship in Sustainability, Green Management and Environmental Economics**

**Stiftungsprofessor für Nachhaltigkeit, Umweltmanagement und Umweltökonomie**  
**Professore straordinario in sostenibilità, gestione verde ed economia ambientale**

in the newly founded Competence Centre for Economic, Environmental and Social Sustainability. The position is for three years and may be renewed for additional three years.

Though the research interest of the position holder may be broad, the research in the competence center shall be related to sustainable and circular economy that promotes local economic circuits, taking into account decarbonization, the preservation of primary resources, and the supply chain. Specific research topics of interest include the following:

- the promotion of a circular and sustainable economy while maintaining natural balances;
- the sustainability reporting practices and the management of sustainability;
- the measurement of socio-economic impact of climate change with a focus on mitigation measures for natural hazards;
- the ecological transition (at the social, economic and production levels) guiding the civil society, private, and public sectors towards new ways of producing, distributing, and consuming energy, raw materials, and services.

We invite interested candidates to send a CV to [president@unibz.it](mailto:president@unibz.it) within **30 September 2022**. For more information, please contact us at the same email address.
