

Announcement of a Professorship Position in Innovative Hydrogen Technologies

The Free University of Bozen-Bolzano, Italy, is planning to open a position of an

Endowed Professorship in Innovative Hydrogen Technologies in the Ecological Transition
Stiftungsprofessor für Innovative Wasserstofftechnologien in der ökologischen Energiewende
Professore Straordinario in Tecnologie Innovative dell'Idrogeno come Elemento della Transizione ecologica

in the newly founded Competence Centre for Economic, Environmental and Social Sustainability. The position is for three years and may be renewed for additional three years. Though the research interest of the position holder may be broad, the research in the competence center shall be related to hydrogen in the context of the ecological transition towards a sustainable and circular economy. Specific research topics of interest include the following:

- innovative solutions for the production, storage, distribution and utilization of hydrogen;
- technologies for a sustainable and competitive production of hydrogen from renewable sources;
- technologies and processes for an efficient conversion between hydrogen and electricity;
- relationships between a hydrogen economy and a circular economy at the social, economic, technological and environmental levels;
- comparisons between traditional and innovative technologies for the hydrogen economy.

We invite interested candidates to send a CV to president@unibz.it within **30 September 2022**. For more information, please contact us at the same email address.
