

Research project: FUTURE LAB. Lebensplanung | progetto di vita

Team: Heidrun Demo (responsabile), Rosa Bellacicco

Duration: 01/2021 - 12/2021

Partners: In collaboration with the three School Authorities of the Province of Bolzano-Bozen.

Funding: ESF European Social Fund

Abstract

In line with the European key competence of initiative and entrepreneurship, the project aims to train teachers' skills to support a life planning of pupils and pupils with disabilities that focuses based on self-determination, particularly in the orientation phases of lower and upper secondary school.

The training course consists of 52 hours of innovative didactics both in terms of contents and teaching/learning methods. At the end of the training, the participants will be able to set up orientation projects and promote with concrete actions the principle of self-determination in everyday school practices. The innovative character of the bilingual training for teachers and the strong methodological variety of the course should be particularly pointed out.

The Competence Center has developed the structure and contents of the course and will evaluate its impact.
