

Good Sampling Matters

State-of-the-Art Methods
for Impactful Systematic Reviews

14 October 2025 | 12:00 – 13:00
Campus Bozen-Bolzano City Centre
Room E4.11

Systematic reviews reduce bias, highlight research gaps, and shape the future of science—but only if their sampling is done right. In this seminar, Michael Gusenbauer (Johannes Kepler University Linz) shows what good sampling looks like, why many reviews still fall short, and how systematicity builds the foundation for impactful reviews.
