

# THE FLYING EGG CONTEST

26 May 2026 | 15:30 – 18:30 | unibz  
Campus NOI Techpark Bozen-Bolzano  
Room B1.1.12

Fakultät für Ingenieurwesen  
Facoltà di Ingegneria  
Faculty of Engineering

unibz

A creative hands-on challenge to design and build a capsule that safely drops a raw egg from the sixth floor of Building B1, aiming to land as close as possible to a target – without breaking the egg. Solutions must be assembled in class, where teams will present their design choices to the evaluation panel before testing.

Open to everyone, with teams of 2 – 3 participants (each team must include at least one B.Sc., M.Sc., or PhD student in the Faculty of Engineering).

The winning team will receive a commemorative plaque – and, of course, eternal glory.

## Evaluation Criteria

- Egg integrity (mandatory)
- Landing accuracy
- Economic and environmental sustainability
- Creativity and originality
- Structural optimization
- Efficiency of the protection/damping system
- Aerodynamic performance

The detailed rules will be e-mailed by  
**Lorenzo Maccioni** to interested participants
